## SUMMARY

I am a highly creative and detail-oriented Software Engineer specializing in MongoDB, Express, React, and Node. With a background in administrative support, I've cultivated strong problem-solving, organizational, and project-management skills.

## SKILLS

**PROGRAMMING LANGUAGES:** Javascript (ES6+, Node), Python 3, HTML5, CSS3/Sass

**FRAMEWORKS & LIBRARIES:** Express.js, React.js, jQuery, Bootstrap, Bulma

**TOOLS:** MongoDB, Git, Netlify, Heroku, Vite, Cloudinary

## PROJECTS

**t'day** Mar. 2021 - Present

Fully responsive social networking site built with JavaScript, Node and Express, using MongoDB for database and data visualization. t'day is an anonymous, collective online journal where users rate their day on a scale of 1-5, post and comment on public entries, and view the aggregate average rating score in real-time, with the ability to filter by age group, country, and gender. Additional features include private user profiles with post and comment history, bookmarks, a comprehensive search page, private, encrypted journals, and both user-specific and collective charts pages displaying ratings data.

**YelpCamp** Apr. 2021 - May 2021

Yelp but for campgrounds: a fully responsive CRUD site where users can create/edit/remove their own profiles for campgrounds across the country and review others' campground profiles. YelpCamp features geolocation using Mapbox and user authentication and authorization using Passport.js. Layouts were created using EJS and the Cloudinary API was used for image storage.
